

Vicky Taylor  
Berean Academy  
2017 Teacher of  
the Year

My fascination with computers began in the mid 1980's and has grown into a passion that hasn't faltered since. By the 1990's I took my fascination to college to learn more. I continue to take a college course every now and then so that I may remain current with the advances in technology.

In 2004 I was hired at Berean Academy. Through the years I have enjoyed watching my Scholars get excited about computers too! It has been my privilege and my great joy to guide them through the exploration of old, current, and upcoming computer technologies.

I was not expecting to receive the wonderful honor of "Teacher of the Year". Feeling much appreciated by my wonderful students already, it is with much humility that I accept the admiration of my fellow teachers and administration as well.

Thank You!  
Vicky Taylor

Year after year Vicky has led our Scholars to great success in the annual Cochise College Computer Challenge.

Last year she began training in the Cyber Patriots competition and again our Scholars are performing admirably.

We are extremely proud to know Vicky and blessed to have her as a Mentor to our Scholars.

Pastor Jim Fogarty  
Berean Academy Board President
